Personal:

Date of Birth: December 04, 1972.
Nationality: Israeli.
Social state: Married.

Qualification:

April, 2011 – Advanced study of diagnosis and treatment of ADHD in children, Ministry of health – Israel.

November, 2008 – Specialist Certificate, Pediatrics, Ministry of Health – Israel.

June, 2005 – Israeli Board Certificate in Paediatrics Part II – Medical Scientific Council – Israel.

June, 2003 – Israeli Board Certificate in Paediatrics Part I – Medical Scientific Council – Israel.

September, 2002 – General Medical Science – Ministry of Health – Israel.

October, 2000 – Certificate of Rotating Internship, Rabin (Belinson-Schneider) Medical Centre of Israel

June, 1999 – Israeli Medical Qualifying Certificate, Israel Medical Association, Medical Scientific Council – Israel.

March, 1999 – Physician Diploma, Diploma in General Medicine and Surgery, Universita' Degli Studi dell'Aquila, Italy.

Training:

December 2010-April 2011 – ADHD Diagnosis and Treatment course. Tel Hashomer Hospital – Ministry of Health Israel.

Five months intensive teaching course. The teaching provide care for common and rare cases of ADHD including co-morbidity. In addition, I was exposed to all kinds of different ADHD cases with management of a wide spectrum of drug treatment in combination with para-medical treatment including behavioural treatment, emotional treatment with a full involvement of parents and scholar staff.

June 2007-februar 2009 – The Weinberg Child Development Centre at Edmond and Lily Safra Children's Hospital, Tel Hashomer offers multidisciplinary evaluation and treatment for children with developmental disabilities from neonates through adolescence. The Centre has treated children with disabilities or at risk for developmental difficulties for more than 15 years, and is among the first three centres in the country.

The Center currently provides clinical services to approximately 1000 new children per year, and sees approximately 700 ongoing patients per month. Our team comprises more than 60 professionals from all related areas. Clinical services include comprehensive diagnostic assessments, ongoing medical, orthopaedic, psychological, occupational, physical and speech therapies, teaching and support groups.

The Centers includes three daycare facilities for disabled children and care is provided daily to the children by a professional team of teachers, therapists and consultants.

In addition, the Center provides training to students and professionals from all related fields and advocacy for families through agencies that provide services for children with disabilities.

The Weinberg Child Development Center is part of the Edmond and Lily Safra Children's Hospital and of Sheba Tel Hashomer Medical Center, which is the largest and most comprehensive medical center in Israel. Sheba is one of the most prominent teaching and research hospitals and is affiliated with Sackler School of Medicine at Tel Aviv University and it houses the Gertner institute for health policy and epidemiology and the National Education Center for training healthcare.

During the training period as a researcher, I managed directly or supervised the care of outpatients, with expose to a wide spectrum case of paediatric developmental disorders and pathologies. In addition, we provided consultation for parents, other physicians, scholar staff and social security.

May 2001-April 2006 – Paediatric Residency, Scheider Children Medical Centre of Israel is a tertiary centre and considered the biggest in Israel.

As a teaching hospital affiliated with the Sackler School of Medicine at Tel Aviv University, Schneider Children's plays an integral role in training programs for all medical students and residents, as well as nurses and paramedical staff.

Training is provided to residents in paediatrics and in other specialties on elective rotations. The hospital also serves as a teaching department of paediatrics by conducting a clinical clerkship for medical students and residents from the New York State Track.

About 50% of Schneider Children's physicians serve as instructors and lecturers in the Faculty of Medicine at TAU. In so doing, the hospital's teaching and training programs help boost the ranks of highly skilled professionals in the field of paediatric medicine in Israel.

My paediatric training during the residency was in the general paediatric wards, the clinics and the PICU.

We managed wide spectrum cases of paediatric pathology in all different disciplines.

As a senior resident I managed directly or supervised the care of patients in PICU, ER, NICU and paediatric wards.

My paediatric emergency training during residency consisted of a total of 18 months during which time I was exposed to all kind of different paediatric emergencies and responded to them accordingly.

October 1999-October 2000 – Rotation Internship.

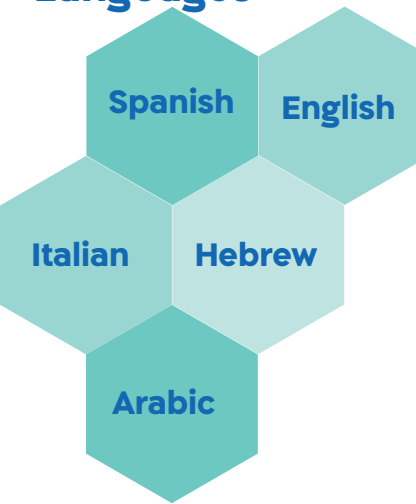

Rabin (Bellinson Schneider) Medical Centre with rotation in different wards.
